Work and Project Experience

Instamedia (Sep 2020 - Apr 2021)

Junior Unity Programmer

- **Gameplay Programmer** - Programmed small mini-games with Unity and Spark AR, either with C# scripting or visual scripting.
- **Shaders & VFX Programmer** - Created effects using Unity's particle systems and shader programming
- **Sequence Programmer** - Setup sequences using the Timeline Editor to tailor the Augmented Reality experience based on the client's provided storyboard.
- **Research and Development** - Researched on various Augmented Reality software and plugins that utilised for specific projects requested by the clients, such as Facebook's Spark AR for F and Zapworks Studios.

Polypixel (Dec 2019 - Apr 2020)

Junior Technical artist

- **Shader Programmer** - Upgrade their old Unity products to Unity 2019 version and the HDRP pipeline. Also did quality checks on the products for it to be ready for customers such as collision checks, prefab checks and LOD checks.
- **Gameplay Programmer** - Created a small walkable GDC Demo to showcase the company's products within a mobile and tablet device environment.
- **Research and Development** - Researched on various services and products for the company to branch out, such as Augmented Reality and Broadcasting.

Persona Theory Games (Feb 2019 - Apr 2019)

Intern Game Programmer

- **Gameplay Programmer** - Scripted the Tea Reading minigame where the player has to connect the dots to reveal a picture, and can also automatically do it on it's own for tutorial purposes.
